

From the depths of the ocean to the skies above  
From molecules to major infrastructure.  
From your school to anywhere in the world.

Whatever your interests and ambitions, a career in science engineering and technology can help you fulfil them.

"It is a great profession. There is the satisfaction of watching a figment of the imagination emerge through the aid of science to a plan on paper. Then it moves to realisation. Then it elevates the standards of living and adds to the comforts of life. That is the engineer's high privilege."

Herbert Hoover, Engineer and 31st President of the USA

The Engineering and Technology Board (ETB) is a partnership between industry, the government, relevant professions and the education community to promote science, engineering and technology (SET) – and especially to ensure the supply of appropriately skilled individuals for our businesses and economy.

So whether you're already thinking about a career in SET or just want to know more, get in touch and start realising your potential as a 21st century scientist or engineer.

From deep sea diving technician to aeronautical designer.

From nanotechnologist to civil engineer.

From small business entrepreneur to global project manager.
